EDUCATION

- **B.Tech in Artificial Intelligence and Data Science**
Jaipur Engineering College and Research Centre, Jaipur
(Overall 86.9% | 2024)
- **10+2 (2020) - Swami Vivekanand Model School,**
Bhilwara | [CBSE](#)
(80% in PCM)

WORK EXPERIENCE

Data engineer Intern | BM Infotrade Private Limited

Jan 2025- Present

- Built scalable ETL pipelines in **Azure Data Factory (ADF)** with **Incremental Load, CDC, and parameterized workflows.**
- Implemented **SCD Type 1 & 2** for accurate historical tracking in data warehouses.
- Performed **EDA** and feature engineering to enhance AI/ML model performance.
- Developed end-to-end **ML data pipelines using Python, SQL, and Azure.**
- Used **Azure Purview** for data scanning, classification, lineage, and governance.

Data Science Intern | i4 Consulting Private Limited

June 2024 – November 2024 (Duration - 6 months)

- Built an intelligent medical term search system using **FuzzyWuzzy & BioBERT**, achieving **90% accuracy** with real-time suggestions.
- Developed a scalable **XML-to-MySQL** data pipeline with **80% clean text extraction**, enhancing integration and model performance by **15%.**
- Achieved **85% precision in NER** using transformers & madspacy for accurate medical term extraction.

PROJECTS

Python Chatbot | [Python](#)

Uses speech recognition to capture input and pyttsx3 for audible responses.

Opens web pages in the browser via the webbrowser library. | [Github Url](#)

Spy Eye - Wanted Person Tracking System | [Python](#)

A face recognition-based cutting-edge system that uses the **LBPH algorithm** for facial recognition and the **Haar Cascade Classifier** for reliable detection, made possible with **OpenCV.** | duration ~ 2 months | [Github Url](#)

Weather App Python | [Python](#)

Mausam Dekho App is a Python weather app built with **Tkinter**. It fetches current weather data like temperature and pressure using the **OpenWeatherMap API.** | [Github Url](#)

SKILLS

C++ | Python | MySQL | AWS | LLM
| DBMS | Pyspark | Azure Data
Factory|Sci-kit learn | Machine
Learning |AI| Django |API |NLP|
Tensorflow|spacy|Pytorch|GEN AI

ACHIEVEMENTS

5 stars at Hackerrank in C++ and Python

The research paper was published on "**Data Visualization on E-Commerce data**" in Pratibodh journal | [Research paper](#)

VOLUNTEER EXPERIENCE

As an **Educator**, I helped provide free education to underprivileged kids in the college area through [the ZARURAT Social Club](#), fostering their growth and success.

We enhanced robotics and tech proficiency at [Stargent Robotics Community](#) with Python chatbot projects.

INDUSTRY AFFILIATIONS

Mentee at Microsoft Engage 2022:
Developed a face recognition system and presented it in a [Video.](#)

Hackathon at BITS Pilani:
Participated in a collaborative project.

Smart India Hackathon 2022:
Gained foundational knowledge in AR/VR technologies.

Delegate at Modern United Nations (MUN): Showcased leadership and public speaking.
