Leetcode

Skills

PROGRAMMMING LANGUAGES

Python - 4/5 | SQL - 4.5/5 | HTML/CSS/JS - 4/5

LIBRARIES / FRAMEWORKS

Pandas | NumPy | Sklearn | Matplotlib | Seaborn | Flask

TOOLS & PLATFORMS

Tableau | PowerBi | Microsoft Excel | VS Code | Google Cloud Platform (GCP)

Education

Shri Ramswaroop Memorial College of Engineering and Management.

Computer Science

August 2019 - September 2023

Bachelors of Technology

Degree Certificate

AlmaBetter

Data Science

December 2023 - May 2024

Full Stack Data Science and AI

Certificate

Certifications

Machine Learning

August 2022

ShapeMySkills Private Limited

Web Development Bootcamp

October 2023

Udemy

Java Development Bootcamp

October 2022

Udemy

Acheivements

TECHGIG GEEK GODDESS Coding Competition Finalist 2022

TECHGIG

August 2022

Certificate

Solved 250+ coding problems across platforms such as AlmaBetter, LeetCode, HackerRank, and DataLemur.

Summary

Data Enthusiast with a B.Tech in Computer Science, dedicated to utilizing data insights and analytics to address real-world challenges. Committed to optimizing decision-making through data-driven strategies and eager to contribute to innovative solutions that enhance organizational performance.

Experience

K2Q Capital Limited

December 2024 – Present

Python Developer - Data Analyst

Delhi

Develop Python programs for stock market data scraping, analysis, and automation.

Analyze market trends to support data-driven trading strategies.

Utilize Google Cloud Platform (GCP) for cloud services and Bitbucket for version control.

Work with large datasets from various financial data sources and APIs.

Focus on building scalable, efficient, and reliable Python applications for market intelligence.

AlmaBetter

December 2023 - November 2024

Data Analyst Trainee

Currently a trainee in AlmaBetter’s Data Science and AI program, with a strong focus on data analytics, statistical modeling, and data visualization.

Worked on 20+ real-world datasets, gaining hands-on experience and enhancing analytical problem-solving skills.

Developed expertise in data analysis and visualization tools to create impactful reports and dashboards that drive actionable insights.

Continuously advancing knowledge of methodologies to effectively communicate findings and support data-driven decision-making.

Projects

Book Recommendation System

May 2024

Python | Sklearn | HTML/CSS | Flask | Collaborative Filtering

AlmaBetter Verified Project

Developed a Popularity-Based Recommendation System that selects the top 50 most popular books, each with an average rating from over 150 reviews, providing users with a curated list of highly rated, widely adored titles for effortless discovery.

Built a Collaborative Filtering-Based Recommendation System, filtering users who have rated at least 100 books and focusing on books with more than 50 ratings. A pivot table was created with books as the index and users as columns, which allowed for the calculation of Cosine Similarity to recommend the four most similar books based on user preferences and queries.

Leveraged data from over 17,000+ user ratings, making personalized recommendations more accurate and tailored to user interests, offering a intuitive book exploration experience.

Airbnb Booking Analysis - EDA

March 2024

Python | Pandas | NumPy | Matplotlib | Seaborn |Tableau

AlmaBetter Verified Project

Conducted comprehensive EDA on Airbnb bookings data, identifying 5+ key trends that could potentially improve booking demand forecasting by 10% and optimize revenue strategies by 5%, based on similar industry studies.

Cleaned and pre-processed 48,895 rows and 16 columns of raw booking data, engineering 10+ features, enhancing predictive capabilities.

Created clear and insightful visualizations, including a Tableau dashboard for interactive analysis, potentially increasing customer retention by 5%.

Analyzed booking patterns and trends, delivering 5 actionable recommendations that could potentially boost occupancy rates by 8% and enhance customer satisfaction by 10% based on projected outcomes.
